

10246NAT Certificate IV in University Preparation

Assessment Schedule 2020 - Biology

UPRBIO401 Investigate biological science problems

This unit describes the performance outcomes, skills and knowledge required to investigate and formulate solutions to biological science problems at university entrance level.

It requires the ability to apply biological theory and methodology, as a means of solving a variety of biological science problems at university entrance level.

The unit applies to individuals who are seeking to develop their knowledge and skills in biological science, to facilitate an entry pathway into higher/tertiary vocational education courses, at undergraduate degree or Diploma/Advanced Diploma level.

This schedule may change due to update in course requirements. (Published April 2020)
