

10246NAT Certificate IV in University Preparation

Assessment Schedule 2020 - Chemistry

UPRCHE401 Investigate chemical science problems

This unit describes the performance outcomes, skills and knowledge required to investigate and formulate solutions to chemical science problems at university entrance level.

It requires the ability to apply chemical theory and methodology, as a means of solving a variety of chemical science problems at university entrance level.

The unit applies to individuals who are seeking to develop their knowledge and skills in chemical science, to facilitate an entry pathway into higher/tertiary vocational education courses, at undergraduate degree or Diploma/Advanced Diploma level.

This schedule may change due to update in course requirements. (Published April 2020)
